ANA Massachusetts and TrainerMD Team Up to Develop Intelligent Health Management System for Nurses and Patients

Jonathan Creekmore
TrainerMD Chief Technology Officer

Beginning this Spring, TrainerMD, a Boston-based Health IT company, will begin a study on how to better empower and educate nurses using their Intelligent Health Management System (IHMS). The study program and platform is comprised of both on-site and online solutions to better manage a consumer’s health, fitness, nutrition, and wellness when it comes to both consumer and medical devices. Despite the benefits of interoperability, mobile data, artificial intelligence, and other technology used by TrainerMD for consumers, CEO Joe Howley is most excited to “Better enable those who take health seriously.” From the onset, Howley and team have managed to develop a product that leverages all non-invasive technology for collecting large amounts of performance and potential data to “enhance the Gap in Health and Fitness” through a HIPAA compliant cloud-based means for consumers to better work with their providers. The clinical teams in we’re conducting a 365 days a year, anywhere in the world in both medical facilities and public places from workplaces to fitness areas.

According to the U.S. Occupational Safety and Health Administration (OSHA), a hospital is one of the most hazardous places to work in the U.S. In 2015, 1 out of every 5,000 nurses, post cardiac rehabilitation, back pain management, heart disease, cancer recovery, strengthening, tone-up, improving core-strength and balance, chronic health conditions and more.

ANA Massachusetts members receive a 10% discount as well as access to trainers and medical advisors in a group support setting as part of the program.

The TrainerMD 360° Health Program is a new comprehensive 12-month preventive health education program currently prescribed by physicians to the clients in the greater Boston area. TrainerMD is very excited to partner with ANA Massachusetts to help educate and bring awareness to preventive health initiatives for nurses and patients. The TrainerMD, first intelligent health management technology and system for community hospitals provide exceptional care to a diverse Awardee for Critical Care Excellence from the AACN. Magnet Hospital for Nursing Excellence and a Beacon most critical and urgent cases in the region. We are a love working with us. At Baystate Health, Inc., in beautiful Western MA we value our employees and offer our nurses professional more details by phone at (888) 304-3919, in a group support setting as part of the doctor. In addition, all ANA Massachusetts performers will be recognized quarterly. Looking for nurses of all specialties, ages, and other experts in health and fitness. The TrainerMD board at TrainerMD which consists of healthcare identified and selected by the Expert Advisory Board at TrainerMD which consists of healthcare professionals, such as physical therapists, and others, accompanied by fitness experts such as master personal trainers, fitness professionals, health coaches, and other experts in health and fitness.

3-D body scanning, muscle/balance testing, vital assessments, space-age nutrition support, and big data for patients. It’s all exciting, but TrainerMD’s Chief Medical Officer (CMO), Dr. Scott Lutch notes, “The real key is that TrainerMD has helped so many by developing both a ‘boots on ground’ and remote system that really engages the patient,” referring to the educational workshops, counseling, consultation, and personal consulting included. With personal health management device sales expected to break 110 million devices in 2018 alone, individuals and organizations should consider seeking expert help in managing both Personal Health Management Systems (PHMS) and Consumer Health Management System (CHMS) right now. Groups such as ANA Massachusetts and TrainerMD are possibly developing what a next-generation intelligent health management solution might be, while improving the very health of healthcare professionals along the way.

Those interested in participating in the ANA Massachusetts and TrainerMD pilot study may contact TrainerMD for more information and to sign up. Additional information located at www.Trainer.MD.

ANA Releases New Position Statement Opposing Capital Punishment

Silver Spring, MD – The American Nurses Association (ANA) announced its opposition to both capital punishment and nurses’ participation in capital punishment. This new position is particularly relevant given the confirmation of Judge Neil Gorsuch to the Supreme Court of the United States, who will likely tip the court in favor of capital punishment.

The ANA has long been opposed to nurse participation in executions, either directly or indirectly, as it is contrary to the fundamental moral and ethical traditions of the nursing profession. Today’s announcement strengthens ANA’s position, adding it to the ranks of many U.S. and global human rights organizations and groups opposed to the death penalty, such as Amnesty International, the International Council of Nurses, and the American Public Health Association.

“The American Nurses Association is gravely concerned with the human rights of individuals facing execution,” said ANA President Pamela F. Cipriano, PhD, RN, NEA-BC, FAAN. “Capital punishment is a human rights violation, and ANA is proud to stand in strong opposition to the death penalty. All human beings, regardless of their crimes, should be treated with dignity. For those states where capital punishment is currently legal, the American Nurses Association will continue to provide ethical guidance, education, and resources for nurses and other health care providers dealing with these ethical dilemmas.”

ANAC’s Center for Ethics and Human Rights Approved Board of Directors recently approved the position statement. The statement was presented to the public for a 30-day comment period and subsequently approved by the ANA Board of Directors in December 2016. The full position statement can be found at http://www.nursingworld.org/CapitalPunishmentNursesRole-Statement.pdf.

The American Nurses Association (ANA) is the professional organization representing the nation’s 3.8 million registered nurses. ANA advances the nursing profession by fostering high standards of nursing practice, promoting the safety and ethical work environment, bolstering the health and wellness of nurses, and advocating on health care issues that affect nurses and the public. ANA is at the forefront of improving the quality of healthcare for all. For more information, visit www.nursingworld.org.
